

“I would like to commend you on the quality of your interns in the Sport Management Program. As our season winds down, it’s been obvious that those individuals from Saint Leo University are head and shoulders above their peers. Interns... have come to us from around the globe and those from Saint Leo University have not only out-hustled their peers, but have been rewarded for it.

Your students are go-getters that understand the overall picture. They are clearly more prepared than their peers including interns from other other ‘noted’ sport management programs. Your students understand personal sacrifice, can be trusted with more than ordinary tasks and they truly represent our organization.... in a first class manner. We would also like to thank you for your quality program and the interest in our overall success from your faculty. The SLU program is the best internship program we have experienced, bar none.....!
